

Project Roadmap

Green Tech Coin Tokenimics 101

(Image 1.0)

The table below shows the distribution of the 10 Billion GTEC Utility tokens prescribed by the iBBT management. The exchange rate per GTEC** token is based on \$0.4861 per token or the current exchange rate, as indicated on the coinpaprika.com website. Fund budgets are distributed on a project-by-project case.

The GTEC tokens have a multifunction purpose; they can support specific projects (see tables 1.0 and 2.0 for project details) when a user buys a GTEC token, which is ultimately converted into a Passive Income Reward NFT. Once the NFT is issued against the GTEC value, the specific tokens are burned to remove them from the circulating supply. Each Project’s EBIDTA reward is based on 167,100 Reward NFTs issued.

Energy Exchange	50%	
Green Farming (Renewables)	5%	2% - 30% EBIDTA Rewards
Hydrogen Production	5%	2% - 30% EBIDTA Rewards
Hydrogen Technologies (fuel cells, membranes)	5%	
Teams(iBBT & Green Tech Coin Management)	10%	
Services and Rewards	10%	
Wholesale/Retail Hydrogen Swap (GTEC/HHO)	15%	2% - 30% EBIDTA Rewards

How to Buy GTEC on an Exchange <https://www.mintme.com/token/Green-Tech-Coin>

Disclaimer: This information or any information of the GTEC Coin, does not constitute an offer to sell or a solicitation of an offer to buy an iBlockchain Bank & Trust Technologies Co. (iBBTs) Security "Common Stock", an iBBT Convertible Fractional Token "CFT" or any security offer to the Public or anyone who does not have a direct relationship with HBI & iBBT. Alternatively, the GTEC Coins can be used as Rewards, Merchant Discounts, or Energy Money within iBBT & HBI Energy Society. [Revised Feb. 20, 2023 version 1.0]
